- **Board of V. H. S. E Kerala, India**   2017
  Vocational Higher Secondary

- **State Board of Kerala, India**   2015
  Secondary School

Skills

- Python
- Django
- SQL
- HTML-5,Bootstrap, Css
- postgresql
- Mongodb
- Javascript

Projects

- **JMP Hospital(Hospital Booking website)**
  A web application using Python, Django, Bootstrap, and CSS

   featuring:
  - User authentication
  - CRUD operations (Create, Read, Update, Delete)
  - Patient and doctor management
  This project aims to simplify hospital operations and improve patient care through a user-friendly and secure interface.

- **Cretal(E. Commerce website)**
  A web application built using Python, Django, Bootstrap, and CSS, featuring:
  - User authentication and authorization
  - CRUD operations for products and users
  - Add to cart functionality
  - User profile management
  - Secure checkout and payment processing

  Goals:
  - Provide a seamless online shopping experience
  - Ensure secure user authentication and payment processing
  - Offer a user-friendly interface for product browsing and management
  This project leverages Django's robust framework, Bootstrap's responsive design, and CSS for a visually appealing and interactive e-commerce platform.
